RUST LUXE

Cor-Ten isn't just for cladding. This hot material - weathered steel - is coveted by garden designers for its worn look and rich, ever-changing patina. It's perfect for creating striking, abstract installations in your garden.

GET THE LOOK This garden was designed by London Garden Designer using Cor-Ten steel panels. Company founder Sara Jane Rothwell says the panels cost £1,200-£1,500 each. Expect to pay £2,400 for a similar fire pit.
